	RESPONSE TO		
DATE OF INFORMATION: 1954 and earlier			
THIS IS UNEVALUATED INFORMATION			

## (1) Grounds of the State District Hospital of Tabor.

## (A) Hospital for Surgical Patients.

The construction of this hospital was started about 1935 and was completed in early 1951. under full operation at that time.

The hospital is three stories with a full basement, and all stories are serviced by patient and service elevators. Construction is of brick, cement and steel.

## (B) Hospital for Infectious Diseases.

(C) This building and building B were in the process of construction in 1951 and, were completed by 1954 and were then in full operation. Building C houses all laboratories and therapeutic equipment.

## (D) Administrative Building.

This building was completed prior to 1951, and is two stories high. Like buildings A, B and C, it is of brick, cement and steel construction. All these buildings are considered fireproof.

## (2) Military Barracks.

About 2800 soldiers ranging in age from 20 to 25 received their first training in mechanized artillery here.

To the north and northwest of the barracks are the training and parade grounds and artillery range.
